Every Friday from 14:00 till 16:00 hrs. we demonstrate the possibilities of our solutions. Let us know if you want to drop by and experience it for yourself.

The Elimu solutions Moulded by reality

We use as much existing solutions as possible. However, sometimes the specific situation requires a custom solution. The Elimu solutions are customized solutions for specific challenges in Kenya's education. We highlight two of them.

elimu *by dean*

ElimuPi is a portable educational server that provides access to thousands of educational resources without an internet connection.

The ElimuPi can be deployed at any location, even without grid power, and creates a WiFi network through which devices like tablets, phones, or laptops can access the resources.

ElimuLab is an experience of the power of applied knowledge and practice of ICT. Together with a teacher, students explore a subject in groups by finding digital information, formulating solutions, making a presentation, and finally realizing the solution.
